November 7, 2021

We are hereby submitting our manuscript, "Correcting the Hebbian Mistake: Toward a Fully Error-Driven Hippocampus" for publication in PLoS Computational Biology. This paper represents a major update to the Ketz et al (2013) paper "Theta coordinated error-driven learning in the hippocampus" which was published in this journal. The paper is formatted for the convenience of reviewers, with figures inline and regular spacing — it is formatted in LaTeX and thus easy to produce an alternative version as needed.

Sincerely,

A handwritten signature in black ink, appearing to be "R. O'Reilly", with a long, sweeping horizontal line extending to the right.

Randall O'Reilly
